
MONTHLY MEETINGS

September through June, LARC meetings are held on the second Thursday of the month. Meetings begin at 7:30 pm, St. Jude's Anglican Church, 1537 Adelaide Street North at Fanshawe Park Road East, London, Ontario.

There are a variety of guest speakers, and you will have a chance to meet other hams to discuss your interests in amateur radio. Coffee and donuts are available, and a draw is held at each meeting. All hams, SWI's and interested individuals are welcome.

LARC is associated with the following community organizations:

London Health Unit

LONDON AMATEUR RADIO CLUB

A club dedicated to the hobby of amateur radio. With over 100 members, the London Amateur Radio Club (LARC) is the oldest radio club in Canada, est. 1920.

LARC trains amateur radio enthusiasts to obtain a basic license.

The London Amateur Radio Club holds the Basic course. The course covers a variety of theory and practical information, followed by a test consisting of 100 multiple choice questions. Successful students with a passing grade of 70% receive certification.

SPECIAL EVENTS

As part of our annual program, LARC participates in a number of events with local and international involvement. We encourage our members to participate.

FIELD DAY

JUNE

This annual event is held on the fourth weekend in June. Members test abilities to set-up in an emergency situation. We operate for 24 hours to make as many contacts as possible. The BBQ potluck is an opportunity for members to bring their family and friends to experience amateur radio during this event.

A typical setup for field day

Making contacts on field day

MUSEUMS & HISTORICAL BRIDGES

JUNE

The club participates in the Museums Event, and the Historical Bridges Event. Radio equipment is powered by alternative energy (generator or solar power) to make contacts around the world.

SUPPORT OF MS-BIKE TOUR

JULY

The London Amateur Radio Club has a longstanding relationship with those who run the MS Bike tour in the London region. We provide communication resources at checkpoints and along the route. This is an opportunity to work an "Active Net", using a number of technologies such as APRS, 2 Meter phone and repeater services.

Providing communications at a checkpoint

MS-Bike tour relies on Hams to assist with organizing.
